RE: Testimony of DoctorGlobe services

Mr. Sam R., an employee of XYZ Company was scheduled for an Arthroplasty, acetabular and proximal femoral prosthetic replacement, total hip.

His physician had scheduled the surgery at Hospital A for October 16, 2016.

We researched the hospital on the DoctorGlobe website which identified Hospital A as one of the top 3 institutions in the country, for a total hip replacement surgery.

We notified the member/patient of the DG program and told him that his employer had this program set up to encourage the members to research the DG site and find the top 3 facilities in the country that performed his needed surgery. The DG site would also locate a physician at the top 3 institutes.

It just so happened in this case, that both the facility and physician the patient had originally chosen were on the DoctorGlobe site, top 3 listings.

By the patient choosing this facility he saved his company thousands of dollars and he himself participated in a bonus program.

In the future, we are anticipating that Health Benefit Plan members will utilize the DG website to seek the top institutions in the country that will benefit the patient and Employer group.

Sincerely,

MJ Duthie, PhD ARNP-BC MSN MBA
